

Mobile Expandable Command and Control Shelter

Advanced C4I mobile facility for coordinated and efficient response

Effective crisis management is vital in a range of homeland security (HLS) scenarios including terrorism, natural disasters, and large-scale events. These situations involve multiple national and municipal agencies, making a unified and fully coordinated response essential for a successful outcome.

Elbit Systems' Mobile Expandable Command and Control Shelter is part of its comprehensive suite of HLS solutions. The Mobile Expandable Command and Control Shelter is a portable state-of-the-art C4I facility that can be quickly erected and immediately function as an on-site command and control center.

With Elbits' integrated hardware, software and communications, the unit offers full connectivity to all operational command units of the different Agencies and services bringing effective coordination to the heart of the crisis.

Mobile Expandable Command and Control Shelter

Advanced C4I mobile facility for coordinated and efficient response

High-performance command solution

The Mobile Expandable Command and Control Shelter offers a high-end command solution wherever one is required. With built-in C4I infrastructure, the unit encompasses all the main building blocks of a Central Command & Control facility.

Quickly deployable and expandable

Designed as an all-in-one unit, the Mobile Expandable Command and Control Shelter is easily deployable and ready to act as a fully operational command and control center. The unit contains 17 ready-to-go workstations for decision-makers and staff, and can accommodate additional workstations and command personnel from multiple agencies. The command unit is completely self-contained, and provides its own power and climate control.

Operational Benefits

- Coordinated command center for any HLS scenario
- A fully operational deployed HQ , encompassing all the building blocks of central command
- Field-proven and in operational use around the world
- Quickly deployable and expandable
- Provides full connectivity and mobility at any operational arena
- Fully integrated with Elbits' HLS Simulator

Key Features

- Contains 17 workstations (option for up to 19)
- Expandable to accommodate larger group of personnel
- Advanced multimedia equipment
- Retracts into standard size ISO 20 foot container
- Completely self-contained
- Self-supported energy and climate control
